Abstract (en)

[origin: EP1712348A1] Bag (5) has a carrier material strip with the front side laminated with a window foil (11). An independent claim is also included for a method for producing the bag comprising applying a laminated material strip to the front side of the carrier material, punching out the window and applying the window foil on the front side and over the whole width of the window foil and laminating with thermal activation of the laminated medium.
