Abstract (en)  
The invention relates to a container (1) comprising a wall (2), at least one mouth opening and a separation wall (3) at the inner side of the container arranged at a distance from the mouth opening and defining at least two compartments, wherein the separation wall (3) comprises a part (5) of the wall extending substantially in circumferential direction and to the inner side of the container. The invention further relates to a method for producing the container (1) by providing a sleeve and applying a separation wall (3) to the inner side of the sleeve such that two compartments are defined, wherein the sleeve is constricted circumferentially to form the separation wall (3).
