Abstract (en)
The bag has a closing unit (40) at a base of profiles, where each profile comprises voile supports that carry complementary units, where the closing unit is activated by a slide having color different from the color of voile supports. The profile is provided with uniform color on all the width of the voile supports. An opaque film (20) comprises main wall (14) and gusset that covers a substantial part of voile supports such that only thin continuous borders (45, 49) of the voile support appears on the outside of the bag along the closing unit.
