Abstract (en)

[origin: EP1712503A1] For the production of multi-part printed products, the main product (12) is opened, while carried on a conveyor, so that two legs (S1,S2) form a pocket (4) in the direction of travel to take the insert. Moving clips (9) secure the free edges of pages (15) at openings (16-18) to form a fixed leg at a pocket wall (5) while the other pages fall open at the other leg and expose a pocket to take the insert.
