Abstract (en)
[origin: WO2005097608A1] The invention relates to a storage bin, in particular an open-front storage bin, comprising a base (2,2'), a front wall (10) and a rear wall (20), in addition to two lateral walls which are arranged opposite each other (30a,b,30a',b') provided with, respectively, a stacking edge (8a) on the upper edge thereof (8). Each lateral wall (30a,b,30a',b') comprises at least one dent (32, 32') which extends from the base (2, 2') to the top and interrupts the stacking edge. A bridging element (50), which can be inserted into the region of the dent (32,32'), is provided and the surface thereof is adapted to the form of the stacking edge (8a) and is aligned therewith.
