Abstract (en)
[origin: WO2006081858A1] The invention relates to a container (1) for a cleaning agent comprising a cleaning agent reception body (2), a dispensing opening (4) and a melting closure (3) for closing said dispensing opening (4), wherein said melting closure (3) comprises a stopper which is meltable at a predetermined temperature, thereby enabling the cleaning agent to flow out through the dispensing opening (4). The inventive container is characterised in that it is provided with means for holding the container (1) in such a way that the dispensing opening (4) is downwardly oriented when the container (1) is suspended.
