Abstract (en)
[origin: WO2005088927A1] The invention relates to multimedia page editing on a terminal. A server (SER) supplies pages to the terminal (TER) in the form of object arrangement commands for objects in a multimedia page to be generated. The method according to the invention comprises (a) a preliminary step (12) wherein the server transmits an object-related data packet as well as a temporary store command (CACHE) for the data (DATA), which is identified by a link (node i) in a terminal memory; and (b) a main step (15) wherein the server transmits a descriptive file containing said link for editing the object in a scene being generated in the terminal on the basis of the stored data.
