Abstract (en)
[origin: EP1714578A1] The device has a container for containing a product to be applied, and an applicator with an application unit. The container has a movable system (30) movable in a body (15) of the container. The movable system has a spin-drying unit (31) with a single opening (40) traversed by the application unit when the application unit is introduced into the container to take the product. The movable system is displaced in a unidirectional manner, towards the bottom of the container by force exerted by the applicator, during its re-entry in the container.
