Abstract (en)

Packing bag comprises a shape-stable packing material (28) having a front wall lying on the bag walls (14) and a rear wall (32). The front and rear walls are joined via lateral sealing edges (34, 35) running the longitudinal direction of the bag. The bag is sealed or adhered in the sealing edges of the packing material forming a removal opening when an opening part (26) is removed by applying lateral pressure on the packing material. An independent claim is also included for a multi-packing bag comprising the above packing bag and a plastic packing material. Preferred Features: The bag material and the packing material are mono-materials. The bag walls are joined together in the longitudinal direction of the bag via lateral sealing edges and are sealed or adhered in the sealing edges of the packing material.
