Abstract (en)

[origin: EP1714925A1] Conveying device for charging a processing device (6) with printed products (5) comprises a traction unit (9) having a working part lying on the printed products in a transfer region. Preferred Features: The traction unit is driven by a motor. An auxiliary part of the traction unit is guided on a guide arranged on the working part. The guide lies on the stack (34) using a sliding shoe (18).
