Abstract (en)

The device has locking side pieces (25,26), which are spaced apart from one another. The side pieces (26) are higher than the other side piece (25) so that both the side pieces are movable in the closing position at a locking part (22). The locking part is arranged in the protruding position of pushbutton between the locking side pieces and in the end position of the propelling rod beyond the side piece (26).
