Abstract (en)
[origin: WO2005061079A1] The invention relates to an exhaust gas treatment system and a support structure for treating the exhaust gas of an internal combustion engine, especially of a self-ignited internal combustion engine of a motor vehicle. The invention also relates to a method for producing a corresponding system which comprises a support structure, whereby the exhaust gas can interact with the support structure for treating the exhaust gas, a layer of fibers (S; 60) being disposed on the surface of the support structure (F; 26; 35). Said fiber layer improves the contact of the exhaust gas with the surface of the exhaust gas treatment system.
