Abstract (en)

[origin: WO2005075231A1] Disclosed is a motor vehicle (1) comprising at least one movable roof part (14; 15) which extends between lateral frame parts (3) in the closed position thereof, said frame parts being located above lateral windows. The at least one movable roof part (14; 15) can be displaced from said closed position into an open position held in the body (9). The frame parts (3) can be dismounted in the open position of the roof part/s (14; 15). The inventive motor vehicle (1) is embodied such that each frame part (3) encompasses at least one joint (16) around which individual sections (3a; 3b) of the frame part (3) can be folded (17), or each frame part (3) can be divided into individual sections (3a; 3b) that can be completely separated from one another.
