Abstract (en)
[origin: WO2005078340A1] A recessed lamp suitable for being housed in a recessed hole formed in a panel of a wall or a false ceiling, comprising a reflector (1), means (4) for supporting a light source therein and electrical connection means (3) attached to the reflector. A tubular support (6) is also provided with an outer edge, which can be attached to the reflector and with such dimensions that it can be engaged within the hole, a pair of diametrically opposite wings (7) extending outwards from the tubular support at a present distance from the outer edge and intended to rest on the panel and to be fixed to it when the support is inserted in the hole, in such a way that its external edge is flush with the false ceiling or wall.
