Abstract (en)

[origin: EP1717190A2] The pump has beer and cooling medium pipelines (12, 13) molded-in by a heat conducting material e.g. aluminum. A grouting material (V) is accommodated together with the pipelines in a tray (11), which provides the molding for the heat conducting material. A dual housing is provided i.e., a housing directly accommodating a thermal insulation together with the pipelines. The housing is accommodated in an outer housing forming the pump.
