Abstract (en)
[origin: EP1717378A1] An earth moving machine comprising a chassis (2) on which there is a control position (3) and on which drive means are mounted to allow the machine (1) to move relative to the ground. The machine (1) also has an articulated arm (8) comprising a first member (9) extending from a first end (11), pivoted to the chassis (2), to a second end (12), and a second member (10) having a first end (13) pivoted to the first member (9) and a second end (14) bearing a working part (15). The first member (9) has a first part of the first member (9) with a first width at the lower zone (20) and a second width, which is less than the first width, at the upper zone (19).
