Abstract (en)
[origin: EP1717394A2] The support (4) has a connection zone (11) between a front part (4a) and a rear part (4b) of the support. The front part has an articulation point for connecting the part with a gripping unit (3). The rear part has a housing intended to receive a bolt (10) by an opening of a door leaf panel. The zone has mechanical characteristics assuring relating movement of the front part and rear part follow up to the application of mechanical constrains on the support.
