Abstract (en)
The module has a disk shaped component (5) pre-assembled, before assembling the module to a compressor, to a turbine disk (3) that is upstream with respect to the flow of a gas in a gas turbine engine. The component is pre-assembled by bolting to a mounting clip (31) which is integrated with the disk. The clip is fixed by bolts (7) retained by screws (73) which are tightened on the clip.
