Abstract (en)
[origin: EP1718100A1] The arrangement has anti-ejection units (28) for maintaining a loudspeaker grill (18) integrated to a trim panel (12) of the cab-interior of a motor vehicle. The units (28) maintain the integration of the grill when the vehicle is subjected to a lateral impact and when the grill is not retained by locking units (26). The locking units are carried by an inner peripheral area (24) of the grill and cooperate with orifices (22) arranged at a rim (20) of the panel.
