Abstract (en)

[origin: WO2005075040A1] A multi-priced lottery ticket dispensing machine (1500) is disclose. A price category reception module receives a first price category of a first distribution. The price category reception module receives a second price category of a second distribution. The second distribution is established so that a first association between the first distribution and the first price category has a variable ratio with a second association between the second distribution and the second price category. The multi-priced lottery ticket dispensing machine also has a user input module. Further, the multi-priced lottery ticket dispensing machine has a lottery ticket printer (1510) . The multi-priced lottery ticket dispensing machine also has a controller that receives the price categories, receives an input from the user, and provides an instruction to the lottery ticket printer.
