Abstract (en)

[origin: DE102004008496B3] The closure device has a predefined opening cross-section and a closable extraction opening (9) for inserting chilled goods into the container (1) and/or for extracting chilled goods from it, whereby the extraction opening has an opening cross-section that is smaller than the opening cross-section of the container opening. An independent claim is also included for a cooling container.
