Abstract (en)
[origin: FR2865260A1] The system has a female part (F) to receive a portion of a male part (M). The parts (M, F) respectively comprises of closed valves (15, 9) for closing a fluid line, where the valve is displaced into open position when the system is in connected configuration. The parts (M, F) respectively has closed shutters (19, 17) displaced into open position during introduction of the male part into the female part.
