Abstract (en)

[origin: WO2005092884A1] The invention provides novel soluble conazole crystalline forms (e.g. itraconazole, posaconazole and saperconazole) that include salts, co-crystals and related solvates useful as pharmaceuticals. The invention also provides pharmaceutical compositions comprising, and processes for making, these conazole crystalline forms. Methods of using such compositions for the treatment or prevention of systemic and local fungal, yeast, and dermatophyte infections are also provided.
