Abstract (en)

[origin: WO2005075751A1] The invention relates to a sealing device (1) for sealing a hole (10), such as a drain (18), a manhole or a sewer from ingress of fluids (13) into the hole (10). The sealing device (1) comprise a sealing part (3) adaptable for the surface surrounding said hole (10), and the sealing part (3) encloses a centre part (2) of the sealing device (1). The sealing part (3) and the centre part (2) are connected by a connecting part (16). The invention further relates to a method for manufacturing a sealing device (1).
