Abstract (en)

[origin: WO2005083385A2] The invention relates to a method of evaluating the therapeutic potential of a vaccination program comprising a vaccine for mucosal administration comprising one or more antigens and a vaccination protocol, the method comprising a) subjecting at least one test individual to the vaccination program, b) measuring the level of a biomarker antibody selected from the group consisting of IgA, IgG, IgE and IgX specific to the antigen in a biological sample from the test individual, and c) using the measurements obtained to evaluate the therapeutic potential of the vaccination program.
