Abstract (en)

[origin: WO2005050203A2] The invention provides a method for identifying and/or making compounds for use in reducing and/or preventing fibrosis, comprising the steps: providing a CTGF receptor; providing a test sample; providing a CTGF receptor agonist; exposing the CTGF receptor to the test sample; subsequently or simultaneously exposing the CTGF receptor to the CTGF receptor agonist; detecting and/or measuring the amount of CTGF receptor activation; comparing the amount of CTGF receptor activation detected and/or measured in the presence of the test sample with the amount of CTGF receptor activation detected and/or measured in the absence of a test sample; determining if a compound reduces and/or prevents fibrosis on the basis that it causes no increase or a decrease in CTGF receptor activation. There is also provided compounds for reducing and/or preventing fibrosis and uses of such compounds.
