Abstract (en)  
[origin: EP1719853A1] The cover shield (20) has a corner rail made of metal having a long stretched edge (21) forming a corner profile, which is connected as a one-piece with a sheet metal (23). A tab first side edge (125) is provided by punching out a metal sheet in a corner profile and bent at an angle, so that a first edge and a second edge extend in different directions. The first edge and or the second edge is in a longitudinal direction (29) of a corner profile and in a distance to this an extending connecting device (35) is provided between neighboring edges, with recessed firmly connected.
