Abstract (en)

[origin: EP1720378A1] The hearing device control unit has a data interface to transfer data between the hearing device (HG1,HG2) and data network which is a low-rated network e.g. low-rated home network. The data interface has bidirectional connection to the low-rated network and a display device and operating elements controls the components in the low-rated network. An independent claim is included for hearing device system.
