Abstract (en)  
[origin: WO2005084515A1] The invention provides a cleaning implement (10) for cleaning a hard surface. The cleaning implement (10) includes a mop head (20) pivotably connected to a first handle section (130) and a fluid transfer mechanism that is connected to a second handle section (230) of the implement (10). When the cleaning implement (10) is unassembled and stored in a package (100, 200), the first handle section (130) is disconnected from the second handle section (230). When a user removes the cleaning implement (10) from the package (100, 200), he or she can assemble the cleaning implement (10).
