Abstract (en)

[origin: FR2867062A1] The implant has a flexible band (2) including an inflatable pouch (3) on one of its sides, an implantable chamber (4) and a pipe (5) connecting the pouch with the chamber. The band has an elongated boss, at one of its ends, that includes a self-gripping coating. An opposite end of the band has another self-gripping coating. The coatings are separated and reapplied one against another.
