Abstract (en)

[origin: WO2005084618A1] The invention relates to an agent for colouring keratin fibres, consisting of at least two spatially separate preparations, at least one of the latter being an aqueous preparation and at least one other being non-aqueous and encapsulated, each preparation containing at least one oxo colorant product. The encapsulation consists of a substance that permits the blending of the components of both preparations, when the encapsulated, non-aqueous preparation is added to the aqueous preparation. The invention also relates to the use of said agents for colouring keratin fibres and to a method for colouring keratin fibres, specifically human hair.
