Abstract (en)

[origin: DE102004009492B3] The finger protector is for a printing press (1) with a compression roller (7), which is an adjustable against the form cylinder (8) along a first travel path. There is also at least one protective grille (13) to cover the roll gap between the compression role and the form cylinder. The grill travels with a compression roller along a second path. This second path is smaller than the first path.
