Abstract (en)
[origin: WO2005082757A1] The invention relates to a longitudinal folding device (01, 23) provided with a braking distance (24) wherein printed products (20, 22), which are to be folded, arriving with an inlet speed (V0) are slowed down. Said longitudinal folding device also comprises a folding blade and (03) which is used to push the printed products (02, 22) into a folding gap (06). A stop (13, 14) is displaced along the braking distance (24) of the printed products (02, 22).
