Abstract (en)  
[origin: WO2005085518A2] The invention relates to a rope-like structure (10), particular a core-spun rope, a cord and a rope, wherein the individual fibers, threads, strands and/or cords are provided in the form of longitudinal fibers of a longitudinal fiber structure (40) which are joined to another fiber (50) which extends in a substantially cross-wise manner or at any particular angle in relation to the longitudinal fibers, such that the longitudinal fibers of the longitudinal fiber structure (40) are mutually non-slip and essentially cannot move backwards in relation to each other, wherein the other fibers (50) are untied, at least on one occasion, in relation to the longitudinal fibers and the latter are thus retained thereby.
