Abstract (en)

[origin: US2007066135A1] This housing includes an assembly of sockets each provided to receive a contact by engaging along a (Z) axis, wherein each socket of the assembly is essentially defined by at least two opposite axial lateral walls and includes two elastic locking latches extending in an essentially axial manner from two respective opposite transverse walls. At least one bar acting as a limiting stop with regard to the insertion of the contact in the socket is provided on the front end of each socket, said bar being formed in such a way that the axial projection thereof is located between the latches and does not interfere therewith.
