Abstract (en)
[origin: EP1721541A2] A hair dryer attachment (30) is provided for use with a hand held hair dryer (10) having a barrel (20) with an outlet (22). The attachment has a substantially tubular body (50) with a perforated sidewall (52) having a generally uniform diameter. A first end of the attachment is configured for receiving the barrel (40), and a second end having an outlet (58) is configured for dispensing air flow from the dryer. There are a plurality of openings (54) along the length of said sidewall which are configured for permitting the radial ingress and egress of air flow to and from the attachment.
