Abstract (en)
The chair is assembled of rectangular seat frame (1a) made all in a piece with a backrest supporting area (1b) with a slightly curved front surface (1c). A u-shaped frame (3) with curved lateral segments is fixed to the seat part (1a) with its lower ends. The main backrest (2), also curved, can be slid along the space (1e) between the front surface (1c) of the backrest supporting area (1b) and the u-shaped frame (3) with the assistance of rollers (2a) guided along a slot (1d) provided in the backrest supporting area (1b). The design can also be used for the headboard of a bed.
