Abstract (en)
[origin: EP1722061A2] The door (100) has multiple panels (110,120,130) pivoted at their vertical edges on the side facing the room. The door lock assembly (216,226,236) prevents the panels pivoting and has at least two lock assemblies to prevent one panel from pivoting with respect to the adjacent panel. The number of locking assemblies can at least equal the number of panels.
