Abstract (en)

[origin: EP1722340A2] The method involves interrogating the state of electrical equipments e.g. roller-blinds, lamps and illuminating lamps, of a home automation installation, and developing an indicator of the state of a group of the equipments. A control is developed according to the indicator of the state of the group of the equipments. The control is executed via the equipments of the group. The interrogation involves transmitting an interrogation signal or transmitting a control signal by control transmitters of the installation.
