Abstract (en)
[origin: US2007031500A1] The invention relates to a long-acting solid formulation for parenteral administration, comprising a) triptorelin acetate and b) one or more excipients comprising a polymer or copolymer of lactic and/or glycolic acid or a mixture of polymers and/or copolymers of lactic acid and/or glycolic acid, said formulation containing 10 to 99% of triptorelin acetate by weight with relation to the total weight of the formulation. Said formulation is obtained by means of a method comprising the fusion of a mixture of triptorelin acetate and the excipient(s) on the fusion/extrusion of the triptorelin acetate with the excipient(s), said formulation being embodied such as to release the triptorelin acetate over a duration of at least one week, once administered parenterally to a patient.
