Abstract (en)
[origin: WO2005087438A2] The invention relates to a clamping tool, particularly a clamp chip provided with first and second clamping jaw carriers (4,5) which are associated with a track (1) and which respectively bear a clamping jaw (2,3), wherein at least the first clamping jaw carrier (4) can be displaced along the track (1) in one direction by means of a stepped shifting gear mechanism (6) and is prevented from being displaced in the opposite direction by means of a detachable return locking element (8) and can be displaced along the track (1).
