Abstract (en)

[origin: WO2005084953A2] The invention relates to a self-inking hand stamp (1) comprising a stamp housing (2), wherein a stamping unit (6) provided with a reversing mechanism (7) is arranged and said stamp unit supports stamp types (5) and can be displaced in a stamping position from a colouring position by means of an actuating bar (3) which is displaceably mounted on the stamping housing (2). In the colouring position, the stamp types are arranged on a ink pad (13) which is arranged in the stamp. A receiving compartment (17), which is used to maintain at least one additional ink pad (18), is provided in the actuating bar (3).
