Abstract (en)
[origin: WO2005087908A1] The aim of the invention is to significantly improve the compatibility of bleach activators with bleach-sensitive dyestuffs. To this end, the invention relates to a method for producing coated bleach activators, characterised by the following steps: g) at least one bleach activator is granulated with a binding agent; h) the granulated material from step a) is coated with a solution or dispersion of at least one complexing agent; and i) the coated granulated material is dried.
