Abstract (en)
[origin: WO2005088968A1] A method of distributing video data comprising defining a plurality of programme elements, each programme element comprising a video clip taken from said video data. Each programme element is allocated to one of a predetermined plurality of classes, each class having an associated icon. Data representing a plurality of icons is transmitted to a receiver, each icon representing a class to which a respective one of said plurality of programme elements is allocated. User selection data indicative of a user selection of at least one icon is received, and data associated with the or each programme element associated with the user selection data is transmitted to the receiver. A method for generating video data, and a method for presenting video data are also disclosed.
