Abstract (en)
An air-circulation device (21) has a feed device (22) for circulating air that fits outside a casing (6) and has an intake (41) for circulating air. The feed device for circulating air has a sound absorber (27) and a blocking device (25) for circulating air, especially a flap (26) for circulating air. An independent claim is also included for a method for cooling, heating or ventilating a room.
