Abstract (en)

Cable-retaining clip (5) to be associated with an equipment enclosure (1), the enclosure consisting of a box-like body equipped with an inner room and being provided with at least one aperture (42) for at least a first conductive cable (4) to pass therethrough from said inner chamber to the outside of said enclosure (1). The cable-retaining clip (5) is provided with: - fixing means (10, 14) suitable to cooperate with said aperture for fixing said clip (5) to said enclosure (1); - a channel (11) to be passed through by at least a further conductive cable (6) to be attached to said container (1).
