Abstract (en)

[origin: WO2005092148A1] The invention concerns a storage device comprising a body (1) and at least one storage element (4) linked via linking means (9) to retaining means (3) mounted horizontally mobile in the body (1), the storage element (4) capable of being horizontally removed and inserted from and into the body (1) with the retaining means (3) and vertically lowered and raised relative thereto after being removed from the body (1). The device is characterized in that the linking means comprise links (9) fastened to the retaining means (3) and retaining the storage elements (4) at various locations, and the means (M) for actuating said links (9), controlling the vertical movements of the storage element (4).
