Abstract (en)

[origin: WO2005082208A1] The table service is for use and storage within the home or in drinking and eating establishments and is comprised of several matching pieces. A hole or opening (2) is formed in the plate (3), and a protruding ball form (1) or several protruding areas with consideration to design, colour, structure, pattern, logo or advertisement are placed on the rim of the plate (3). When the plates are being stacked for storage (4) the hole (2) is placed directly over the protruding ball (1) of the underlying plate (3) which is shown in the shape of a ball (1). The ball (1) visually integrates, either partially or totally through the hole (2) from the underlying plate (3). The hole (2) and protruding ball (1) are for the placement of matching accessories on the plate (3), shown here as a container for sauce or dip (5, 6) and/or glass or cup (7) which are appropriately placed on the plate (3) for stable storage and grip during use. The matching accessory with the ball (1) or the cavity (10) is favourably placed on, in or underneath the accessory (5, 6, 7), for connecting to the hole (2) or the ball form (1) on the rim of the plate (3).
