Abstract (en)

[origin: WO2005097776A1] The invention relates to a cosmetic or pharmaceutical composition containing, in a physiologically-acceptable medium, at least one polymer comprising at least one novel monomeric compound having optical effect properties. The invention also relates to a cosmetic method of making up or caring for keratin materials, such as the skin belonging to the body or face, lips, nails, eyelashes, eyebrows and/or hair, consisting in applying one such cosmetic composition to said materials. The invention further relates to novel monomeric compounds having formula (I) and optical properties, the polymers comprising same and the uses thereof in a composition in order to provide said composition with optical effects, e.g. fluorescence or optical brightening.
