Abstract (en)
[origin: WO2005088032A2] The invention relates to a fixing strip for cable and/or cover strips. The fixing strip comprises a base surface and a rear wall which is essentially orthogonal in relation to the base surface and which comprises a support surface which is placed on the retaining surface. The aim of the invention is to produce a collection of cover and base elements for laymen, which are economical to produce and simple to mount, and which can also be retrofitted by electric installations. Said aim is achieved by virtue of the fact that the fixing strip comprises at least two different form elements which are used to the fix the cover profiles.
